## Quick Operation

ASMAX has two operation modes: intelligent voice and buttons, and you can freely choose according to your own habits.

When the main unit is connected to the official ASMAX app and the phone is connected to the internet, the main unit can perform intelligent voice interaction operations such as route navigation, sending messages, making and receiving calls, playing music, and so on.

When not connected to the network, the main unit can perform voice commands through local offline voice commands.
